ICC (Instructional Certification Course)

Education is the Answer !

At the congress you will also get the opportunity to take one of the instructional certification courses (ICC) for medical doctors and physiotherapists. The one-day training courses are designed to teach you the basics of technology, indications, contraindications, and practical application of ESWT and radial pressure waves (RPW). Each participant should take the final test after taking the courses. Overall, the lectures will be given in English and some lectures will be simultaneously interpreted in Korean.

Certification

ICC is the only program acknowledged by ISMST, and the one and only international certificate will be given to those who have completed the course and the final test.

Congress Venue - Medi City, Daegu

Daegu has established its reputation as Korea's leading medical city with five medical schools and over 3,500 clinics. Furthermore, Daegu is full of cultural assets represented by nine UNESCO World Heritage Sites boasting the traditional beauty of Korea. Daegu is thriving today in its role as the national leader built upon a rich cultural heritage and a long history of leading medical industries.
